

OPTIMIZE COMPONENTS STORAGE

Make your traditional warehouse **SMART**: By installing bars on your shelves, you can create a pick-to-light system that will enable you to always have a complete tracking of the items within your company.

Thanks to its modular structure, it can be easily adapted to all warehouse layouts. Smart Bars are natively connected with Archimede management software and they can help you in the setup and changeovers. Forget the treasure hunt, you will always know where your components are located in your company!

AFTER

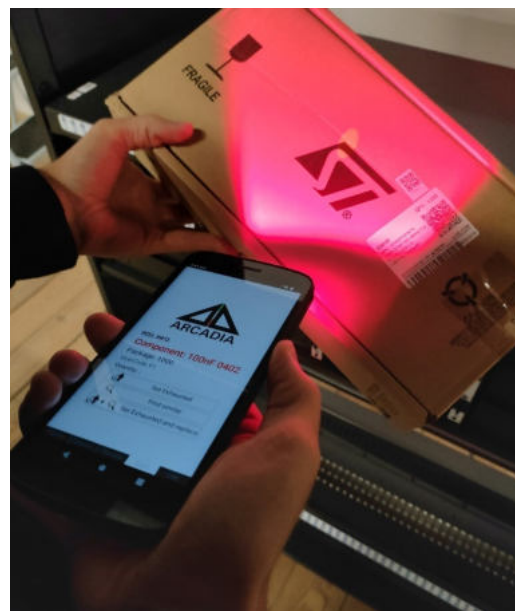

EASY AND QUICK THANKS TO PDA

Store Items

Scan the item UID with the PDA: suggested positions will be highlighted for you. Place the item where it best suit and confirm the position with your PDA.

Pick Items

Receive a pick list of Items from your MRP, ERP or Archimede: all the locations will be highlighted. Confirm the item picking with you PDA.

NATIVELY CONNECTED, SMART AND CONFIGURABLE

Follow the material flow from the incoming phase to its utilization in production. Data can be easily synchronized with external sources, enabling a plug and play experience.

Ind. 4.0 ready: full traceability, easy link with factory MRP software, custom solution for P&P software

Bars dimension can be adapted to your needs
